***We will grass finish cattle per request**

All of our cattle spend the growing season on rotational pastures. We strive to have the highest quality genetics. Our unique pasture blends of grass and legumes provide high nutrition to the cattle while protecting the environment. Foraging on plantains and chicory and many other diverse plants add Oleanic acid, Beta-carotene and Lutein to their diet. Our finishing grains are diverse including Organic high Omega-3 flax seed. Our grain finished cattle will be marbled and flavorful, but maintain much of the health value of 100% grass-fed cattle.
